

## Insulet's Omnipod DASH™ Insulin Management System Receives ISO 27001 Certification for Information Security

November 20, 2018

### ***The Only Insulin Pump to Receive Both ISO 27001 and DTSec Certifications***

BILLERICA, Mass.--(BUSINESS WIRE)--Nov. 20, 2018-- Insulet Corporation (NASDAQ: PODD) (Insulet), the global leader in [tubeless insulin pump](#) technology with its Omnipod® Insulin Management System (Omnipod System), today announced it has received ISO (International Standards Organization) 27001 certification of its Omnipod DASH™ System. ISO 27001 certification is the international standard for best practice in an information security management system globally. Insulet also recently announced that the Company received the [DTSec \(Diabetes Technology Society's\) Cybersecurity Standard for Connected Diabetes Device Security certification](#) for the Omnipod DASH System. Insulet is the only insulin pump company to receive both certifications.

ISO 27001 is an internationally recognized standard for information security best practice that adheres to the highest international data security standards. DTSec leverages ISO/IEC 15408 to provide a framework for risk-based, multi-stakeholder definition of security requirements. The Omnipod DASH System, Insulet's next-generation platform, was designed to be the foundation for the Company's future innovation. With the ISO 27001 and DTSec certifications, the Omnipod DASH System is now globally recognized for incorporating the highest standards for information storage and cyber security and safety, including secure data transfer between the Pod and the personal diabetes manager (PDM), as well as secure cloud storage.

"This is part of a large-scale organizational commitment to ensure the highest-level of cyber security of our Omnipod DASH System and to provide information security our Podders can trust," said Dr. Aiman Abdel-Malek, Executive Vice President and Chief Technology Officer. "We are committed to remaining at the forefront of best-in-class standards to secure patients' safety and privacy. Our compliance with these internationally recognized standards sets us apart from others in the global insulin pump market and provides our users with further peace of mind that they can rely on a highly safe and secure product to manage their diabetes."

Insulet's Omnipod DASH System received FDA clearance in June 2018 and is currently in limited market commercial release. The Company expects to fully launch the product commercially in early 2019.

### ***About Insulet Corporation:***

Insulet Corporation (NASDAQ: PODD), headquartered in Massachusetts, is an innovative medical device company dedicated to making the lives of people with diabetes and other conditions easier through the use of its Omnipod product platform. The Omnipod Insulin Management System provides a unique alternative to traditional insulin delivery methods. With its simple, wearable design, the disposable Pod provides up to three days of non-stop insulin delivery, without the need to see or handle a needle. Insulet also leverages the unique design of its Pod, by tailoring its Omnipod technology platform for the delivery of non-insulin subcutaneous drugs across multiple therapeutic areas. Founded in 2000, more than 150,000 users across the globe rely on Insulet's Omnipod Insulin Management System to bring simplicity and freedom to their lives.

On July 1, Insulet assumed direct operations of its Omnipod Insulin Management System product line in Europe, including sales, marketing, training and customer support activities. This allows Insulet to be closer to the diabetes community and identify opportunities to support European customer needs over the long-term, as Insulet does in the United States and Canada.

### ***Forward-Looking Statement:***

This press release may contain forward-looking statements concerning Insulet's expectations, anticipations, intentions, beliefs or strategies regarding the future. These forward-looking statements are based on its current expectations and beliefs concerning future developments and their potential effects on Insulet. There can be no assurance that future developments affecting Insulet will be those that it has anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond its control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, and other risks and uncertainties described in its Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission on February 22, 2018 in the section entitled "Risk Factors," and in its other filings from time to time with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should any of its assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. Insulet undertakes no obligation to publicly update or revise any forward-looking statements.
