

Insulet's Omnipod DASH® System Now Available in Canada

January 18, 2021

ACTON, Mass.--(BUSINESS WIRE)--Jan. 18, 2021-- Insulet Corporation (NASDAQ: PODD) (Insulet or the Company), the global leader in [tubeless insulin pump](#) technology with its Omnipod® Insulin Management System (Omnipod System), today announced the launch of the Omnipod DASH® Insulin Management System (Omnipod DASH System) in Canada.

"We're thrilled to bring this convenient and easy-to-use insulin delivery system to Canada," said Bret Christensen, Chief Commercial Officer of Insulet. "The Omnipod DASH System's sleek, touchscreen Personal Diabetes Manager (PDM), combined with the existing benefits of Pod therapy, will provide Canadian users even more freedom, flexibility, and discretion to simplify their diabetes management."

The Omnipod DASH System combines a tubeless, wearable, waterproof¹ Pod with an easy-to-use, touchscreen PDM. The handheld, smartphone-like PDM features an intuitive interface that allows customers to wirelessly control the Pod to deliver customizable basal rates and bolus amounts. The Pod provides up to 72 hours² of continuous insulin therapy and allows individuals to simplify life with no more daily injections.

"The Omnipod System has been a vital part of my diabetes management since 2013 and I am excited that the Omnipod DASH is coming to Canada," said Esther Funk, a Registered Nurse and Certified Pump Trainer living with Type 1 diabetes. "The touchscreen design makes it simple and easy to operate. Thank you Insulet for continuing to provide new and innovative options for diabetes management."

Rebecca Redmond, who will be among the first individuals in Canada to use the Omnipod DASH System, says, "When it comes to the Omnipod DASH, I am most excited about the Pod Site Tracker as a tool to help me rotate my Pod sites, which makes insulin absorption more effective. This is an example of how Omnipod DASH supports better, more proactive diabetes management. I am also looking forward to the new touchscreen and the fact that it looks like a smartphone."

Insulet plans to launch the Omnipod DASH System throughout Canada on a province-by-province basis throughout 2021 to coincide with reimbursement by provincial health programs.

1. The Pod has a waterproof IP28 rating for up to 7.6 metres for 60 minutes. The PDM is not waterproof.
2. Up to 72 hours of continuous insulin delivery

About the Omnipod DASH® System:

The Omnipod DASH Insulin Management System is the first and only tubeless device that can provide three days of non-stop insulin delivery. Its unique design consists of just two parts; a lightweight, tubeless, waterproof, wearable Pod controlled by a smartphone touch-screen Bluetooth® enabled controller, minimizing the number of components to carry. The Omnipod DASH System offers simple, smart, discreet insulin control for people diagnosed with Type 1 or insulin-requiring Type 2 diabetes. The Omnipod DASH System, which received FDA clearance in June 2018, is the only [DTSec](#) and [ISO 27001](#) certified insulin pump for cyber and information security and safety.

About Insulet Corporation:

Insulet Corporation (NASDAQ: PODD), headquartered in Massachusetts, is an innovative medical device company dedicated to simplifying life for people with diabetes and other conditions through its Omnipod product platform. The Omnipod Insulin Management System provides a unique alternative to traditional insulin delivery methods. With its simple, wearable design, the disposable Pod provides up to three days of non-stop insulin delivery, without the need to see or handle a needle. Insulet also leverages the unique design of its Pod by tailoring its Omnipod technology platform for the delivery of non-insulin subcutaneous drugs across other therapeutic areas.
